Destinations of Leavers from Higher Education Report Summer 2015 (DLHE)

*Destinations information relating to those who left the
University during 2013-14*

*Compiled following the University's formal return to the High Education Statistics Agency 24th April
2015 – Prepared by Senior DLHE Officer, Mark Thomas BA Hons. Dip. CEIG (HE)*

1. Introduction

The Destinations of Leavers from Higher Education (DLHE) report has been compiled during the Summer of 2015 following the formal submission of the DLHE return to the Higher Education Statistic Agency (HESA) on 24th April 2015, following the January 2015 survey period. Compiled by the Careers Service, a separate version of this report with additional policy information is made available to university staff.

Details of Destinations are provided in the Appendices section, by Faculty and then by Further Education College Partner.

It is recommended that Students consider the information contained within this report version as part of a wider Careers advice and guidance provisions made through the Careers Service and Faculties, and are discouraged from making Career decisions purely on the information provided.

Appendices – Destinations by Faculty and Further Education College

The details provided below are split by Faculties (appendices 1 to 5), schools split within each Faculty and programmes listed within schools. Destinations relating directly to Coleg Sir Gar and Pembrokeshire College students are listed in appendices 5 & 6 following the five UWTSD Faculties.

Before referring to the actual destinations information listed in the appendices please take a minute to read the notes listed below:

1. Joint Honours destinations are listed against both programme elements for the sake of simplicity
2. Destinations details are provided where the Leaver is employed, studying or doing something else. No reference is made where the Leaver refused to respond, is unemployed or where no response was received. Note that the overall unemployment rate for UWTSD Leavers is 4.7%.
3. The scope and limitations placed on us for the information gathering stage limits what we can collect and report. The responses provided relate to the data collected according to HESA rules and data requirements and is taken from the actual HESA return as opposed hard copy forms. As such reference to data outside the HESA DLHE return is not included *e.g. "hoping to do PhD in future"*
4. Job/course Destinations are listed as they were provided by the Leaver/third party and as such there may be some title variation *e.g. 'TEFL – Foreign Language Teacher – Teacher (China)'*
5. Additionally, Leavers and third parties can and do provide basic informational only without providing the necessary additional information *e.g. using 'Secondary School' instead of 'Secondary School Maths Teacher' or 'MA' as opposed 'MA Education'.* In such instances this is quoted as 'unspecified'.
6. Where the Destinations information provided states unspecified this may be due to the Leaver not specifying on their hard copy/on-line return or during telephone Survey with the Leaver or third party
7. Current employment Destination does not necessarily reflect actual Employability. For many Leavers reporting employment in non-graduate level jobs, the data reported may not reflect the full picture or context, and sometimes the reality is the opposite of that reported:
 - *e.g. many of the non-Graduate level jobs reported as part-time reflect the need for those studying part-time to support themselves financially (also, the vast majority of further study is at degree level or above)*
 - *e.g. a Leaver looking to enter Social Work may have taken a lower level job to gain experience or exposure to a specific environment or access to a network would have this Destination reporting a 'lower level of Graduate Employability' which is a factor in League Tables. Paradoxically, this approach suggests more/better Employability through the application of decision making and Career planning*
